Professional Summary

Business Systems and Operations Technology professional with 8+ years of experience improving workflows, reducing technical debt, and delivering scalable solutions across diverse sectors, including finance, construction, and consulting. Certified Power Platform Developer with hands-on expertise in AI-assisted process optimization, Power Automate/BI, Dataverse, security architecture, and third-party integrations to bridge critical data gaps. Trusted partner to those aiming to improve financial visibility and build systems that support smarter growth.

Professional Experience

Software/Systems Developer | Annapurna Construction – Winter Garden, FL (Oct 2025 – Present)

- Led Dataverse schema migration of 39K+ records across legacy and new tables to resolve duplicate data, unstable schema issues, and scaling limitations while preserving relationships and validating production readiness.
- Integrated automations with QuickBooks Online, QuickBooks Time, and DocuSign REST APIs to eliminate duplicate data entry, reduce payroll/billing delays, optimize reporting, and create a source of truth.
- Co-built 2 internal workspace applications using TypeScript, React, Power Apps Code Apps, and Dataverse to modernize production operations, reduce technical debt, and improve office-to-field workflow visibility.
- Implemented a scalable GitHub-based monorepo platform architecture with shared components, established documentation, governance standards, and reusable development patterns.
- Designed role-based access control model integrating Entra security groups, MDM, Dataverse security roles, and app-level permissions to protect operational data while enabling new employees to onboard quickly.

Senior PMO Analyst | KPMG US – Orlando, FL (Jan 2021 – Oct 2025)

- Managed \$15M+ in budgets for state government accounts where margin pressure, contract ceilings, and compliance requirements demanded accurate forecasting and financial controls.
- Automated Excel reporting processes using Alteryx to reduce month-end reporting bottlenecks and save hundreds of hours of manual PMO effort.
- Achieved \$239K+ cost savings via resource optimization that improved engagement margin and efficiency.
- Facilitated project meetings with cross-functional teams and supported junior staff through hands-on training.

Administrative Assistant | Westgate Resorts – Orlando, FL (Aug 2017 – Jan 2021)

- Produced operational analytics with Excel, SQL and Tableau to improve productivity and leadership visibility.
- Streamlined reporting processes and strengthened documentation and training programs.

Core Competencies

Process Improvement | Workflow Automation | Data Migration | Financial Reporting | Operational Analytics | Systems Integration | Database Architecture | Project Delivery | Client Service | Technical Documentation
